Stable production. Colorful results

Our Direct to film consumables enable a stable production process and an unlimited color variety, made possible by highest quality consistency in production and using technically advanced components. All to leave Textile Print Service Provider without limits to excite customers with vivid and precise transfer results.

Direct to film printing provides several benefits, such as no requirement for pre-treatment and increased durability of final goods. Making sure those benefits pay off, the right tried and tested components must be used.

Highest quality Transfer film

The films surface coating is crucial in many regards. It's not just about hot and cold peel properties or line sharpness. It's about the intensity of colors, the depth of black and also about the surface of

the final transfer. This is why we develop and source all consumables with and from European market leading companies.

Hotmelt Powder for your needs

Powder is available for different types of garment application, such as work- or sportswear. It acts as binder between the transfer film with its special surface and any garment. Ensuring best touch and feel, interplay between tried and tested components is required.

The European production reflects highest quality and safety standards
